

Operating Policy Statement

Bridgnorth Aluminium operates an Integrated Management System (IMS) for its manufacturing operations, which provides a framework for setting and reviewing our objectives and targets.

We are committed to delivering quality products, safely, preventing injury and ill health and with total concern for the environment and the management of Energy

Our policy and objectives will be implemented throughout our operation and applied as products, processes and infrastructure develops.

We are committed to complying with all current and future relevant legislation, industry standards, our customer requirements and to any other requirements to which the organisation may subscribe.

Our quality assurance, environmental, health & safety and energy practices are based on and follow the requirements of the current standards of,

ISO 9001, ISO 14001, OSHAS 18001 and ISO 50001

Bridgnorth Aluminium maintains a proactive awareness of the impacts of its activity, on the environment, and surrounding areas, and are fully committed to pollution prevention and the protection of the environment. We support the purchase of energy efficient products and services, and design for energy performance improvement.

Significant environmental aspects will be communicated externally as and when required.

The Senior Management of Bridgnorth Aluminium are committed to promoting and delivering improvements in the management and performance of its Integrated Management System (IMS), ensuring its continuing use, and driving the philosophy of continual improvement throughout the organisation. Periodic reviews will ensure that this IMS remains appropriate to the organisation. This Policy Statement is available throughout the organisation to all of our employees. It will be made available to any outside interested parties and our customers, on request.

With commitment to ensuring available resource and information, our objectives are,

To continually meet or exceed our Customers' needs and Expectations.

To continually reduce our impact on the Environment that we live in.

To maintain a safe working site, protecting our workforce, visitors and contractors.

To continually improve our energy performance
